New Zealand PR

PROFILE

Highly motivated and self-driven full-stack developer with over 800 hours of coding on multiple full-stack development projects in an agile environment through an academic journey. Worked on various personal and group projects to continuously improve my soft and technical skills. Seeking a software developer position to deliver exceptional user experiences in a professional work environment.

SKILLS

HTML / CSS / SCSS / Tailwind / Javascript / React / TypeScript / Node.js / C# / .Net / SQL / MongoDB

Problem-Solving

To track workout progress, I created an app named Hot Body Buddy. It logs customized routines, compares past performances, counts gym visits, and provides motivation by displaying their goals, quotes, and images. This app not only solved my problem but also illuminated how I can assist others with their issues. This experience sharpened my problem-solving insight and reinforced my passion for software development.

Teamwork

Through academic journeys, personal initiatives, and a GovHack competition, I've collaborated on various software projects. This has equipped me with the ability to integrate feedback, leverage diverse perspectives, and contribute effectively to team objectives. With a solid foundation in teamwork, I'm eager to further enhance these skills in a professional environment as I believe this is the key to success in the software development industry.

Growth Mindset

To be the best version of ourselves, I believe we should continuously improve on what we lack. As a graduate software developer, I embrace challenges and welcome others' feedback, believing they refine my skills. To overcome my apprehension of meeting new people, I have actively engaged in networking events and technical seminars. Simultaneously, I am committed to expanding my knowledge through online courses in software development. My desire is to always experience growth, both personally and professionally.

EXPERIENCE

Frontend Developer

Green Kiwi - Govhack / Aug 2023

- Actively involved from inception to deployment, contributing to planning, designing, developing, and deploying an innovative platform that addresses New Zealand's major city concerns and reduces carbon emissions.
- Led the design and development of the social page, post creation functionalities, and navigation bar.
- Used Agile methodology, ensuring iterative development and continuous feedback throughout the project lifecycle.
- Utilized the Miro board for effective collaboration, visualization, and project management.

Shop Manager / Technical Support

CoinSingingBooth / Jun 2021 - Aug 2023

- Supervised setup and maintenance of hardware and software connections such as PoS, Efpos, Screen, Karaoke Software, mics, wires, remotes, speakers and fans.
- Managed Instagram account @coinsingingbooth. This included creating and posting promotional photos and videos and also planning events to provide customers with a great experience.
- Boosted our Instagram followers by approximately 700, directly impacting sales growth.

CERTIFICATION

AWS Cloud Practitioner Certification

Amazon Web Service (AWS)

Valid through: May 2022 - May 2025

EDUCATION

Software Developer Job Ready Programme

Industry Connect / Jul 2023 - Sep 2023

- Delivered by industry veterans, this digital course prioritizes hands-on solutions over traditional methods. It covers .NET, C#, ASP.NET MVC, SQL, database best practices, SSRS services, and system integration, emphasizing real-world commercial applications.

Level 6 Full-stack Web Development

Enspiral Dev Academy / Aug 2022 - Dec 2022

- Completed Dev Academy Full-stack Web Development Course, investing in over 800 hours of coding on multiple projects in an Agile team environment and acquiring in-depth knowledge of full-stack development technologies, including Figma, HTML, CSS, TailwindCSS, JavaScript, React, Redux, Restful APIs, Express.js, Node.js, SQL, Jest, Git, and Github.

Level 4 Certificate in Information Technology

Unitec Institute of Technology / Jul 2021 - Dec 2021

- Information Technology Foundations (HTCS4601)
- Web Design Foundations (HTCS4602)
- Programming Foundations (HTCS4604)
- Database Project (HTCS4605)
